

From "TÉCNICA NUTRICIONAL FOLIAR S.L." and "CARBOCALIDAD S.L." onwards **TNF**, dedicated since 2002 to the design, manufacture and marketing of fertilizer products, we aspire to be a benchmark of modern agriculture, effective, quality and respectful with the environment.

For this reason, an Integrated Management Policy is established in the areas of Quality and Environmental Management with the fundamental objective of achieving the total satisfaction of its customers through a constant effort to improve quality, nature analysis, magnitude and significant environmental impacts of our activities, products and services on the environment and without forgetting its constant commitment to the safety and quality of our products.

At **TNF** we are aware of the importance of human health, care for the environment and natural resources, equality of rights and obligations; and without making discrimination by race, sex, religion, political ideology and ethics in relations with all stakeholders.

Our integrated management system is based on ISO 9001 and ISO 14001 standards, and has been developed in order to control all processes so that the products produced are safe and have the greatest possible acceptance by our customers, they comply with the legislation in force, with the specifications defined by the product as well as with other requirements that the organisation undertakes related to their environmental aspects, guaranteeing, throughout the production process, quality levels, legality, safety and environmental protection.

From **TNF** we are present in the main producer markets of the world and our vocation involves the help and advice to our main stakeholders: farmers, irrigation societies, distributors and cooperatives in the use of our products.

In line with this vocation, **TNF** management provides the necessary resources to guide us towards continuous improvement and satisfaction of our stakeholders:

- Have qualified, conscientious and sensitized staff in an optimal way for the job.
- Obtain and maintain standards on our products based on Carbocality, Innovation, and Ecology, recognized in the Society to the extent of our capacity, regulations, and current state of the art.
- Keep track of our management system processes.
- Maintain a working environment and facilities appropriate to the processes carried out in it to achieve maintain at all times the requirements established both by legislation, by our customers, as well as by the company itself.
- Ensure sustainability so that its activity has the lowest possible environmental impact through efficient use of energy, natural resources, as well as control of waste generation and emissions, including a commitment to continuous improvement in the performance of our significant environmental aspects and pollution prevention, from a life-cycle perspective of our activities, products and services.
- The identification of risks and opportunities, the planning of treatment actions to achieve continuous improvement, taking into account the needs and expectations of our clients, and the other stakeholders involved.

The Directorate of **TNF** will ensure that this Policy is understood and accepted by all the staff of the organization, and periodically verify that the Integrated System established maintains its effectiveness and adequacy, fulfilling the objectives planned and revised periodically. This Policy is available to interested parties upon request.

AS OF 15 JULY 2023

The Directorate of **TNF**
