

# REMOVES ECO

**STRAIGHT LIQUID INORGANIC FERTILIZER BASED ON MANGANESE (Mn)**

**REMOVES ECO** is a liquid fertilizer for foliar application, particularly indicated for the prevention and correction of manganese deficiency.

The manganese content enhances its role in the phosphorylation and respiration processes, accentuating the ability to synthesize chlorophyll.

## ADVANTAGES

Special manganese formulation to which has been improved its power of penetration and assimilation both via foliar and root, ensuring the selectivity and affinity of these manganese complexes.

## RECOMMENDATIONS

Provides extra protection to the plant.

## INSTRUCTIONS FOR USE

pH of application: 5 to 5,5

CROP	DOSE
Lettuce, tomato, vegetables in general:	3-5L/ha ①
Citrus, avocados, fruit trees in general:	3-5L/ha ①
Olive, vine, extensive in general:	3-5L/ha ①
Ornamentals and gardening:	3-5cc/L water ①

① Foliar application in times of need, repeating the application at 10/15 days if necessary.

For a good result it is essential to wet the plant well. Apply at the peak of the day and regulate the pH of the mixture to be treated at 5 – 5,5.

These application doses of the product are recommendations. Contact the company for more specific recommendations to adjust to your particular situation and avoid over-fertilization.

Use only in case of recognized need. Do not exceed the recommended dosage.

## DECLARED CONTENT

	w/w	w/v
Manganese (Mn), as sulfate, soluble in water	2,00%	2,18%

## ADDITIONAL INFORMATION

Please also refer to the information provided in the Material Safety Data Sheet (MSDS).

**Neutralisation can occur on contact with bases.**

"Fertilizer usable in organic vegetable production according to RCE 834/2007 in accordance with UNE 142500".

**FOR PROFESSIONAL USE ONLY**
