

TNF 10-10-10

COMPOUND LIQUID INORGANIC FERTILISER BASED ON MACRONUTRIENTS NPK 10-10-10

TNF 10-10-10 for its special formulation, provides the plant with nitrogen, phosphorus and potassium of easy assimilation and rapid action.

TNF 10-10-10 is recommended for flowering and/or set times, maintaining a good growth rate.

ADVANTAGES

It provides the plant with nitrogen, phosphorus and potassium of easy assimilation and rapid action, as well as small amounts of microelements. Greater vegetative vigor, advance maturation, improve size and increase crop yield.

RECOMMENDATIONS

Recommended especially when it is appropriate to promote vegetative growth, for flowering times and/ or curdled, maintaining a good growth rate.

INSTRUCTIONS FOR USE

pH of application: 5 to 5,5

CROP	DOSE
Lettuce, tomato, vegetables in general:	3-5L/ha ①
Citrus, avocados, fruit trees in general:	3-5L/ha ①
Olive, vine, extensive in general:	3-5L/ha ①
Ornamentals and gardening:	2-4cc/L water ①

① Foliar or root application in times of need, repeating the application after 15 days if necessary.

These application doses of the product are recommendations. Contact the company for more specific recommendations to adjust to your particular situation and avoid over-fertilization.

DECLARED CONTENT

	w/w	w/v
Nitrogen (N) total	10,00%	12,00%
Nitrogen (N) ureic	10,00%	12,00%
Pentóxido de fósforo (P ₂ O ₅), soluble en agua	10,00%	12,00%
Potassium oxide (K ₂ O), soluble in water	10,00%	12,00%

ADDITIONAL INFORMATION

Please also refer to the information provided in the Material Safety Data Sheet (MSDS).

Keep away from oxidizing agents and strongly alkaline or acidic materials in order to avoid exothermic reactions.

This fertiliser contains urea, which can release ammonia and have an impact on air quality. Depending on local conditions, appropriate corrective measures must be taken.

Low content of cadmium.
