

TNF 4-1-7

COMPOUND LIQUID INORGANIC FERTILISER BASED ON MACRONUTRIENTS NPK 4-1-7

TNF 4-1-7 is an NPK liquid fertilizer specially formulated for all types of plants and crops. Nitrogen favors plant growth while phosphorus and potassium favor flowering and consistency of stems.

ADVANTAGES

It provides an adequate physiological balance and a high qualitative and quantitative yield for crops. Rapid absorption and action in the vegetable. It provides the plant nitrogen, phosphorus and potassium of easy assimilation and rapid action, as well as small amounts of microelements.

RECOMMENDATIONS

Supplement the fertilizer for root use, or to supply the nutrition of the plant, in the phases of high demand and consumption of nutrients, or to correct mineral deficiencies in crops.

INSTRUCTIONS FOR USE

pH of application: 5 to 5,5

CROP	DOSE
Lettuce, tomato, vegetables in general:	30-80L/ha ①
Citrus, avocados, fruit trees in general:	40-80L/ha ①
Olive, vine, extensive in general:	20-60L/ha ①
Ornamentals and gardening:	2-4cc/L water ①

① Root application distributed the amount of product in weekly waterings throughout the crop.

These application doses of the product are recommendations. Contact the company for more specific recommendations to adjust to your particular situation and avoid over-fertilization.

DECLARED CONTENT

	w/w	w/v
Nitrogen (N) total	4,00%	4,48%
Nitrogen (N) ureic	4,00%	4,48%
Phosphorus pentoxide (P ₂ O ₅), soluble in water	1,00%	1,12%
Potassium oxide (K ₂ O), soluble in water	7,00%	7,84%

ADDITIONAL INFORMATION

Please also refer to the information provided in the Material Safety Data Sheet (MSDS).

Keep away from oxidizing agents and strongly alkaline or acidic materials in order to avoid exothermic reactions.

This fertiliser contains urea, which can release ammonia and have an impact on air quality. Depending on local conditions, appropriate corrective measures must be taken.

Low content of cadmium.

FOR PROFESSIONAL USE ONLY
