

TNF Fe ECO

STRAIGHT LIQUID INORGANIC FERTILIZER BASED ON IRON (Fe)

TNF Fe ECO is an iron-based product that provides the plant with this essential micronutrient in a very easily assimilated form.

TNF Fe ECO corrects and/or prevents iron deficiency in any crop.

ADVANTAGES

- Corrects and/or prevents iron deficiencies with gradual and sustained assimilation. Improve transportation within the plant and from outside to inside the plant. Increase the photosynthetic rate and photosynthesis of the plant.
- Obtain a greater and better quantity of the products resulting from photosynthesis. Improves the production of photosynthates per unit of time, higher rate of use of assimilated water.
- Reduce the ferric chlorosis.

RECOMMENDATIONS

- Arable crops: in pre-sowing or pre-transplant. If deficiencies are observed at any time in the crop it will be applied by foliar or fertigation.
- Deciduous woody crops: It will be applied preferably to the soil, just before spring budding and, if deemed necessary, throughout the crop by foliar or root route. Complementary foliar applications may be necessary.
- Citrus trees: before spring and summer budding, preferably by root route. Complementary foliar applications may be necessary.

INSTRUCTIONS FOR USE

pH of application: 5 to 5,5

CROP	DOSE
Lettuce, tomato, vegetables in general:	2-4L/ha ①
Citrus, avocados, fruit trees in general:	2-4L/ha ①
Olive, vine, extensive in general:	2-4L/ha ①
Ornamentals and gardening:	2-4cc/L water ①

① Foliar or root application at times of need, repeating the application after 15 days if necessary.

These application doses of the product are recommendations. Contact the company for more specific recommendations to adjust to your particular situation and avoid over-fertilization.

Use only in case of recognized need. Do not exceed the recommended dosage.

DECLARED CONTENT

	w/w	w/v
Iron (Fe), as sulfate, soluble in water	5,57%	6,41%

ADDITIONAL INFORMATION

Please also refer to the information provided in the Material Safety Data Sheet (MSDS).

Neutralisation can occur on contact with bases.

"Fertilizer usable in organic vegetable production according to RCE 834/2007 in accordance with UNE 142500".

FOR PROFESSIONAL USE ONLY
